

ザーネメディカル クリーム （販売名：ザーネメディ カルクリーム）（製造終 了）

Category-2 OTC Drug

ザーネメディカルクリーム

For xeroderma care

Brand name: SAHNE Medical Cream

SAHNE Medical Cream is a skin moisturizer containing the active ingredient heparinoid 0.3%. Moisturizes and restores dry troubled skin. Thanks to its small tube container, which is convenient to carry, you can use it quickly even when you are away from home.

Point

- Thanks to its small tube container, which is convenient to carry, you can use it quickly even when you are away from home. Useful for the treatment of points in narrow regions. It does not leave the skin greasy after application! It can also be applied on the face. Indicated also for dry skin of children.
- For the face, please put an appropriate amount on the hand and then apply it to the face.
- This product should not be used on the eyes, periorbital area, or mucosa (for example, oral cavity, nasal cavity, vagina, etc.).
- Fragrance free, uncolored, ethanol free.
- Contains no steroids as ingredients.

Indications

Skin roughness

dry skin

Relief of the following symptoms:

Finger roughness, xeroderma, elbow/knee/heel/ankle keratosis, dry skin in children, frostbite (except for skin erosion), cracks/chapped skin of the hands and feet, lumpy/tight sensation of skin after wound/burn (except for the face), swelling/muscular pain/joint pain after bruise/sprain

Dosage and Administration

Rub an appropriate amount into the affected lesion or apply it by spreading it with gauze once to several times a day.

1. Follow the specified dosage and administration.
2. When allowing children to use the medicine, a guardian must be present to watch the child and instruct them how to use it.
3. Attention should be paid so that the medicine will not come into contact with the eyes. In case the medicine comes into contact with eyes, immediately rinse them with water or lukewarm water. If the symptoms are severe, seek an ophthalmologist for medical treatment.
4. This medication is only for external use. Do not take it orally.
